Five tools to Increase Your Freight Operation's Efficiency

Slack

Slack is a chatroom for your whole busines. Create private chats with individuals or larger groups. Create topic-specific channels for projects or perhaps a channel dedicated to discussing service-related issues for your most important clients. Slack allows you to bring your distributed workforce together in a single platform that allows for real-time collaboration in a way email just wasn't built for.

LeanStaffing

LeanStaffing allows you to supplement your US based operations or accounting staff with low-cost team members from around the world and in multiple time-zones. LeanStaffing specializes in Freight Forwarding and Logistics staffing so you'll be getting team members who understand your business from day 1. Use Slack, 1Password, and Supply-Vision to collaborate with your remote workforce securely and in real-time.

1Password

With ransomware attacks on the rise securing your company's important data has never been more important. 1Password allows you to easily store, generate, and share strong passwords with colleagues. Gone are the days of storing passwords on sticky notes or in an insecure email. 1Password allows you to spend less time dealing with hacks, phishing scams, and lost passwords and more time getting work done.

7LFreight

Your staff depends on accurate vendor rates in order to make smart routing decisions. Not to mention providing competitive rates to prospective customers! With vendor rates and surcharges changing daily it can become untenable to keep your database updated for all buy your top few vendors. 7LFreight takes care of tariff data entry and automatically updates fuel surcharge rates for all of your agents and carriers. Their website and APIs make rate shopping by cartage agent, linehaul carriers, LTL carrier, and passenger and carrier airlines a breeze. It's even better if you are using the Supply-Vision TMS as you can auto-rate your vendor costs directly from the shipment costs screen!

Supply-Vision

Supply-Vision was created to help you adapt to an ever changing world. Supply-Vision integrates with leading industry web tools to reduce duplicate data entry and increase operational efficiency. Your customers can submit orders electronically via EDI, APIs, or with our industry leading Customer Portal. Our strong reporting tools and easy to use import and export tools make working with your data a breeze. With the Supply-Vision TMS you can run your business from anywhere in the world: home, office, or from the palm of your hand.
